

# Mahmoud Ramzy

Alexandria, Egypt

(+20) 01001479174   [LinkedIn](#)   [GitHub](#)   [Email](#)

## Summary

---

Software Engineer with a solid foundation in full-stack development (React, Node.js, Spring Boot) and an academic background in AI. Proven ability to build responsive applications, optimize algorithms, and collaborate in Agile environments to deliver impactful solutions

## Education

---

### Alexandria University

8/2019 - 9/2024

BSc. Computer and Systems Engineering

Last term GPA: 3.8

CGPA: 3.35

Graduation Project Grade: A+

## Skills

---

**Programming:** Java, Python, JavaScript, C/C++

**Frontend:** HTML, CSS, React.js, Angular

**Backend:** Node.js, Spring Boot

**Databases:** MySQL, SQL

**Concepts:** Data Structures, OOP, Operating Systems, Database Design

**Tools/Version Control:** Git, GitHub, Docker, Linux

## Experience

---

### Teaching Assistant – Alexandria University & Alexandria National University

9/2024 – 1/2025

- Taught Discrete Mathematics, Network Security, and OOP concepts
- Assisted in preparing assignments and evaluating student performance
- Simplified complex technical topics for students

## Internships and Trainings

---

### Deep Learning Summer Training – Alexandria University

7/2023 – 9/2023

- Completed Deep Learning Specialization (Coursera)
- Worked in a team of 3 on an object detection project using YOLO
- [Project Link](#)

## Projects

---

### Graduation Project: Hate Speech Detection in Arabic Tweets ([Report Link](#))

- Developed NLP model for Arabic hate speech detection
- Improved F1-score from 0.528 to 0.5479
- Applied preprocessing, data augmentation, and ensemble models

### Full Stack Restaurant Application ([Code Link](#))

- Built full-stack web app using React.js, Node.js, and MySQL
- Developed responsive UI and integrated backend APIs
- Collaborated in a team of six using GitHub

### **AI Agent for Solving 8-Puzzle (Code Link)**

- Implemented DFS, BFS, and A\* algorithms
- Built backend using Spring Boot and frontend with HTML/CSS/JS

### **Linear and Nonlinear Equations Solver (Code Link)**

- Implemented numerical methods (Gaussian elimination, LU decomposition, Newton-Raphson, etc.)
- Built backend using Spring Boot and frontend with Angular
- Collaborated in a team of three

### **Command Line Chess Game (Code Link)**

- Developed a command-line chess game using C

## **Certificates**

---

### **Deep Learning Specialization – Coursera** 8/2023

- Finished 5 courses of the specialization on Coursera, learned about neural networks, CNNs, RNNs, hyperparameter tuning. **Verification Link**

### **Professional Front-End Web Development – Udacity** 8/2022

- Implemented a weather application dealing with API, semantic HTML, responsive CSS, and advanced JavaScript. **Verification Link**

### **Web Development Challenger Track – Udacity** 7/2022

- Introduction to web development technologies such as HTML, CSS.
